EDUCATION

B.Sc. in Computer Science & Engineering - Green University of Bangladesh

CORE EXPERTISE & DEFENSIVE SECURITY

- SOC Operations: SIEM Alert Monitoring, Incident Triage, Log Analysis, Threat Intel Correlation, Detection Tuning.

FEATURED PROJECTS

1. Signal Sentinel - Secret Signal Detector [Python, Flask, Three.js, Random Forest ML]

Covert channel detection in line-coded digital signals with Shannon entropy, jitter analysis, and 99%+ ML accuracy.

2. Campusfillo [Next.js App Router, TypeScript, NestJS, Prisma, PostgreSQL, Docker]

University-verified student merit ledger, automated repo code grading, isolated Code Arena, and tournament Elo.

3. Wildfire Spread Simulator [Python, Pygame, BFS/DFS, A* Pathfinding]

Real-time fire spread simulator with wind/elevation awareness and autonomous firefighter agents.

4. Parking Management System [8086 Assembly Language, emu8086]

Low-level vehicle slot allocation, fee calculation, income auditing, and hardware memory resets.

CERTIFICATIONS & HONORS

- Software Testing with Generative AI (Simplilearn SkillUp, Code: 10685004, Sept 2026)
